

from his home at Rondebosch. It appeared low in the sky, travelling south, and of a green colour. Mr. B. F. Jearey had seen the meteor from Belville. Mr. D. C. Alletson had seen it over the sea from the Camps Bay side of Table Mountain (the Pipe-Track). He agreed with Mr. Pratt's description except as to colour. Mr. Alletson issued an invitation to members to use the 10-inch reflector of the Diocesan College, in return for which he hoped members would instil some knowledge of astronomy into the minds of the students of the College.

It was announced that at the next meeting Mr. D. C. Bunnell would lecture on "Cosmic Dust and Luminous night-clouds."

~~The meeting then terminated.~~ The Chairman informed the members that Mr. H. E. Houghton had presented a picture of his John Herschel's reflecting telescope, with Table Mountain + Devil's Peak in the background, to the Society, to be framed and hung on the walls of the meeting-room. The meeting expressed its appreciation of this gift in a suitable manner. The meeting then terminated.
