

Minutes of the Third Ordinary General Meeting of the Cape Centre held at the Royal Observatory on Wednesday, 13th November, 1968.

The Chairman, Mr H Lagerweij, presided. There was a good attendance and there were no apologies for absence.

Before proceeding with the meeting, the Chairman announced the death of Mr Hirschberg and requested Mr Simanbott to say a few words in tribute. Mr Hirschberg had been ill for some time and had been bed-ridden for a long period in both the Jewish Old Age Home & later in the Canadian Hospital.

Dr Stobie then delivered an extremely interesting lecture on the "Theory and observation of Cepheid Variables Stars". This was well illustrated. The large number of questions was indicative of the interest shown.

Dr Stagy then proposed a vote of thanks.

The meeting closed at 9.35 p.m.
Mr Lagerweij then, on behalf of the members of the Cape Centre, presented Dr and Mrs Stagy with a memento for the Centre. Those present rose and sang "In they are jolly good fellows".
The Tea was then served.
