Letter by David Gill at the Royal Observatory Cape  
Hope 6 June 1880 about arrangements for obser  
1882 Transit of Venus

But at Prince Edward Island and Crozet Island  
the meteorological conditions are, to say the least,  
doubtful, and both altitude and meteorolo-  
-gical conditions are unfavorable at Reunion &  
Mauritius Islands. I think therefore Sir George  
Airy has decided wisely in selecting South  
Africa as the point of attack for accelerated  
Ingress, and I am now engaged in making  
the necessary enquiries as to the best sites for  
observing stations in the Colony.  
But now let us look how the balance of  
observing power is to be maintained.  
We have opposed to the Cape (i.e. for Retarded  
Ingress) with large parallaxes factors and sufficient  
altitudes, the whole of the great Observatories  
of America with the perpendicular stations at Bermuda  
and Jamaica; also with less favorable alti-  
-tudes and factors, the whole of the British  
French, Italian and some of the German  
Observatories.  
It is of primary importance, in any dis-  
-cussion of Transit of Venus Contacts, that  
there should be a reasonable similarity

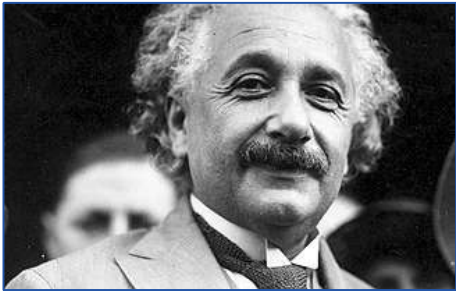

in the Instruments.  
But unless the  
is erected before D  
sibility of balanc  
at Washington, C  
and the Observato  
Oxford, Lince  
Rome &c.  
I can say there will  
-swading a few q  
-bringing with the  
aperture. These gr  
particular any case  
taking up their p  
times would come  
Equatorials, made for  
no doubt be suppl  
for two ~~the~~ additional  
for the declination, the  
great Equatorial  
sufficient. But  
I do not hesitate to  
the large Telescopes  
more than than

1. The first part of the document discusses the importance of maintaining accurate records of all transactions and activities related to the business.

2. It also emphasizes the need for regular audits and reviews to ensure compliance with applicable laws and regulations.

3. The document further outlines the various methods and techniques used to collect and analyze data, including surveys, interviews, and focus groups.

4. Finally, it provides a detailed overview of the results and findings of the study, highlighting key trends and insights that can inform future decision-making.
