

Opinion poll

Which one of the following reflects your opinion on the status of Pluto?

- 1. I agree with Pluto being demoted to a dwarf planet leaving only 8 planets in our solar system
- 2. The IAU should have kept the solar system at 9 planets
- 3. The IAU should have classified the solar system into gas giants, rocky planets and dwarf planets, but all of them planets
- 4. I really don't care about this controversy. After all, the solar system has not changed when the IAU changed our definitions of a planet.
