

Astronomical Society of South Africa.

(Johannesburg Centre).

Jan. 27th 1927.

Dear Sir,

I received your letter of January 17th & brought it to the notice of the members at a subsequent meeting. We are having enquiries made of the instructions accompanying your letter & sending these to all of our members who are in possession of telescopes. At present, while the fate of the T.B. Wireless is still uncertain, it was decided to do nothing in the way of organisation. The wireless time signals have been found too inaccurate so far for occultation observations, but on the re-organisation of the service we hope to represent this, as a Society, to the authorities. I will inform you as soon as we have been able to achieve anything.

Yrs faithfully

H. Troughton

Hon. Sec.
