

Annual report to the ASSA AGM - August 2024

Dave Blane – (Caretaker) Photometry and Spectroscopy Section

Photometry and Spectroscopy

No reports on photometry or spectroscopy were received. The photometry of variable stars is reported in the Double and Variable star Section annual report.

As far as can be ascertained Percy Jacobs is the only amateur involved in spectroscopy in South Africa at present although a member of the West Rand Centre is looking at setting up a spectroscopy system.

A director for this section is urgently needed.
