

Lacaille's Catalogue of Southern Deep-sky Objects

From my backyard in Durban, KZN with a Celestron 8"
EdgeHD telescope on an AVX mount and a Canon 600D

April 2016 – August 2016

This catalogue of Lacaille's Southern Deep-sky Objects was imaged from my backyard, just outside of Durban.

I used a Celestron 8" EdgeHD telescope on an AVX mount with a Canon 600D camera. ZWO auto-guiding scope and camera and PHD software. One image, Lacaille II-9 (IC 2602) was captured with the camera piggy-backed on the telescope. Most images processed in PixInsight.

Lacaille I.1 47 Tuc, NGC 104
